6. MANNER OF USING GAS SERVICE

6.1 LIMITATIONS OF GAS UTILIZATION

Gas Service utilized by the Customer is subject to all applicable limitations set forth in a Service Application or Contract, the applicable Rate Schedule, and the provisions of these Service Standards, and must be used in such a manner as not to effect unnecessary disturbances or harmful conditions on the system of the Company used in supplying service to other Customers. Standard retail gas rate schedules are based on exclusive use of the Company's service and are not applicable for emergency, standby, or supplementary service.

6.2 RESALE EXCLUSION

Gas service is furnished for use of the Customer only and resale of such gas by the Customer to other persons will not be permitted.

6.3 INTERRUPTIBLE SERVICE CURTAILMENT REQUIREMENT

Any class of interruptible gas service offered by the Company shall be on the condition of the Customer's willingness and ability to at any time have such service curtailed in the amount specified by the Company or entirely discontinued. The Company may require evidence from the Customer before service is connected, before a change of rate schedules is permitted, or at other times deemed necessary by Company, that the Customer's standby facilities are adequate and sufficient to properly withstand a complete service interruption, or the Customer shall at such times, in lieu of such evidence, present written assurance, satisfactory to the Company, of willingness to accept either partial or complete restriction of operations, as directed, upon notification by the Company.

6.4 POINT OF DELIVERY

The point of delivery at which gas service is delivered to the Customer, unless otherwise defined in a service agreement with the Customer shall be at the outlet side of the Company's meter (whether installed inside or outside of Customer's building) except for those cases in which the Customer owns the service pipe from his property line to the point or points of utilization in which cases the point of delivery shall be at said property line where the service pipe of Company connects to the service pipe of the Customer.

6.5 ACCESS TO CUSTOMER'S PREMISES

The Customer shall grant permission for authorized agents of the Company to enter the Customer's premises at all reasonable hours to inspect, maintain, repair, or remove the Company's equipment, or to read meters, or for any other purpose relating to service.

6.6 NOTICE REQUIRED WHEN SERVICE DISCONTINUED BY CUSTOMER

When a Customer desires to discontinue service because he no longer requires service at the location where service has been taken, notice thereof shall be given at the office of the Company not less than 3 days prior to the date when service is to be discontinued. The Company will hold the outgoing party responsible for all gas supplied on such premises until such notice is received by the Company, and the Company has made the final meter reading, provided such reading is made within three days (excepting Saturdays, Sundays and holidays) after the date upon which the Company was notified to discontinue service. Service agreements are not transferable by the Customer and new occupants of the premises must make application at the office of the Company before service is rendered.

6.7 INCREASE IN CUSTOMER'S SERVICE REQUIREMENTS

The facilities provided by the Company have a limited capacity to which they are capable of rendering adequate and proper service. Any Non-Residential Customer is therefore required to notify the Company prior to installing additional or increased capacity equipment that will materially increase the requirements for gas service, so that the Company will have adequate opportunity to advise the Customer of the availability of such additional gas and to make proper revisions of facilities, if needed, to handle the additional gas supply.
