Alliant Energy
Second Nature™ Program

ENERGY RESOURCES	2011 Actual Energy Mix	Projected Energy Mix[1]	Generation Location
Eligible New Renewable[2]			
Landfill Gas	7.68%	0.00%	Mayville, WI
Landfill Gas	0.00%	9.39%	Janesville, WI
Solar	0.01%	0.02%	Cedar Rapids, IA
Solar	1.46%	1.64%	Wisconsin Pgs-ART tariff solar providers
Wind	49.12%	50.45%	Hancock County, IA
Wind	8.35%	6.08%	Nobles County, MN
Wind	30.28%	30.34%	Brownsville, WI
Anaerobic Digester	3.10%	2.08%	Fond du Lac, WI
TOTAL	**100.00%**	**100.00%**	

The 2011 actual energy mix shown above represents the resource makeup of renewable electricity (kilowatt-hours) purchased in Alliant Energy's Second Nature program. Alliant Energy's 2011 total electric energy mix contains the following resources: coal (52%), purchased power (41%), natural gas (2%), and other (5%) (a). (Modified: 2/12/2012)

(a)All of some of the renewable energy attributes associated with generation from these sources may be used in future years to comply with renewable energy standards or other regulatory requirements, or sold to third parties in the form of renewable energy credits or other environmental commodities.

[1] These figures reflect the nameplate kilowatt-hour capacity of the power that we expect to generate in 2012 and/or have contracted to provide. Actual figures may vary according to resource availability.

[2] New Renewables are generation facilities in operation on or after January 1, 1997.
