Footnotes:
1/ Municipally owned post
2/ Rates available for existing units only. No new installations of these unit types offered, nor will any unit be replaced due to ballast or fixture failure for any reason.

Type Designations: (LB) Long Bracket; (PT) Post Top; (SB) Short Bracket; (OL) Open Luminaire; (EL) Enclosed Luminaire. For Short Bracket monthly rates deduct $0.80 from the above Long Bracket rates. Short Brackets are those which are 8' or less in length. For separate wood pole, overhead conductor street light system (poles not used for other distribution purposes) add $4.22 per unit price per month.

Service to be Furnished: The Company will furnish all electric energy required to operate the Company owned street lighting system and provide the labor and materials for the maintenance of this system. Upon proper written request from the Municipality, the Company shall install additional standard overhead or ornamental street light equipment and maintain, operate and furnish electric energy thereto, provided that the Company shall not be required to extend the overhead street lighting circuit farther than 400 feet or the underground street lighting circuit farther than 150 feet for each additional street light.

Street light units requested by the Municipality to be served from underground primary distribution facilities in which no other overhead distribution poles are available for mounting of street light units shall be subject to the following provisions:

1. The Municipality shall furnish or arrange for a subdivision developer, or others, to furnish and install all street lighting standards, bases, foundations, trenching, and conduit, where required, with the ownership thereof and attendant maintenance responsibility being vested in the Municipality.

2. The Company shall install and maintain all other street lighting equipment and provide energy therefore.

Additional Terms and Conditions: Should the Municipality request the Company to:

(1) Change the location of any one or more lights owned by the Company it shall reimburse the Company for the actual expense thereof.

(2) Replace existing operable street light facilities owned by the Company (except a fixture over 20 years old) with those of another size or type of lighting unit, it shall reimburse the Company for the net (undepreciated) cost of the facilities removed, plus the cost of removal, less the salvage value if any, of the facilities removed.

(3) Remove operable Company-owned street lighting facilities to reduce the cost of monthly street light service billing to the Municipality to such an extent that in any one year it exceeds the greater of five units or 2% of either the Company-owned overhead or ornamental system, the Municipality will reimburse Interstate for such removal pursuant to (2) above.

For all new extensions, additions, complete or major revisions, or replacements to existing company owned overhead and ornamental systems, only high pressure sodium vapor type street lighting luminaires or lighting with equivalent or better energy efficiency will be installed.

Energy Supply Cost Adjustment: Rider 1M applicable hereto.

Resource Adjustment Charge: Rider RAC applicable hereto.

Conservation Improvement Program Cost Recovery Adjustment: Rider 1C applicable hereto.

Renewable Energy Recovery Adjustment: Rider RER applicable hereto.

Excess Facilities Charge: Any facilities required to provide service in excess of that permitted under this Schedule or the Company's Electric Service Standards shall be provided at a monthly amount equal to 1.6% of the Company's investment in such facilities.
