

Alliant Energy's

Springfield Solar Project

January 2024 update

The 100-megawatt Springfield Solar Project in Dodge County, Wisconsin, is part of Alliant Energy's **Clean Energy Blueprint**, a strategic roadmap to cost-effectively accelerate our transition to renewable energy and reduce carbon emissions. Now complete, the project positively impacts the environment and generates enough energy to power around 26,000 homes annually.

Construction update

The Springfield Solar Project passed the testing and commissioning phases to show it can provide the safe and reliable energy our customers expect.

We're pleased to share we placed the Springfield Solar Project into operation last month! The project's approximately 240,000 solar panels are operating as intended and will provide clean energy for the next 30 years.

We continue to advance our Clean Energy Blueprint to develop low-cost, renewable energy for our customers. In December, we more than tripled our solar energy generation in Wisconsin and expect to complete all 1,089 megawatts of projects within the next few months.

Learn more about these projects and other plans at alliantenergy.com/cleanenergyblueprint. Thank you for your support of the Springfield Solar Project.

Sign up for community solar

Are you interested in reducing your utility bills for the next 20 years? The Alliant Energy® Community Solar program lets customers buy blocks of a solar garden and receive credits for the energy generated for the next two decades.

Last year, we announced our Janesville Community Solar Garden and will start construction this spring. The project will be comprised of 9,000 solar blocks for purchase at \$337 each. A typical Wisconsin electric customer would need approximately 18 solar blocks to offset 100% of their average annual usage.

Our Wisconsin electric customers can begin to receive credits once the project is operational, which we expect will be later this year. We anticipate customers will recoup upfront costs after about 10 years.

For additional information, visit alliantenergy.com/janesvillecommunitysolar.

Benefits to the community

With the Springfield Solar Project complete, the town of Lomira and Dodge County will begin to receive shared revenue payments of approximately \$400,000 annually for the life of the project.

The state-administered Shared Revenue Fund will contribute these payments to the community's annual operating income. Local officials can use the funds as they deem appropriate.

For additional information, visit alliantenergy.com/sharedrevenue.
