

To: Companies with Attachments to IPL and WPL poles

**RE: New way to request attachment to Alliant Energy poles**

Beginning this fall, all requests for new pole attachments to Alliant Energy (IPL and WPL) poles will need to be completed using a new web-based application. The application will allow you and Alliant Energy to better manage requests, as well as track FCC timelines through completion. We will no longer accept requests sent through the email address. If you send an email request, you will be re-directed to use the new application. The new application should also be used for requests for new over-lashing to existing attachments.

To help you learn how to access and use the new application, we will be offering a webinar and a user guide in early fall. You'll be able to find the user guide and any other pertinent information on the same page of the Alliant Energy website that is currently being used for Pole Attachment request information.
