DETERMINATION OF CCRA

The CCRA shall be the quotient of the Recoverable Tracker balance, divided by projected retail sales (therms) of all non-CIP exempt customers for a designated 12-month recovery period. The Recoverable Tracker balance shall be determined by adjusting the prior year-end CIP Tracker balance by:

- (1) Adding financial incentives awarded by the Minnesota Public Utilities Commission (or successor agency) not reflected in the prior year-end balance;
- (2) Adding current year CIP program expenditures at their approved and/or budgeted level;
- (3) Subtracting current year CIP cost recovery through base rates as estimated based on Company's budgeted retail sales.

In addition, the prior year-end CIP Tracker account balance shall be increased by the amortization of the beginning CIP Tracker account balance during the next 12 months. All costs appropriately charged to the CIP Tracker account shall be eligible for recovery through this adjustment and all revenues received from the application of the CCRA shall be credited to the CIP tracker account.

CCRA: \$0.0033 per therm effective January 1, 2015

DETERMINATION OF CONSERVATION COST RECOVERY CHARGE (CCRC)

The CCRC is the amount included in base rates dedicated to the recovery of CIP costs as approved by the Minnesota Public Utilities Commission (or successor agency) in the Company's last general rate case. The CCRC is approved and applied on a per therm basis by dividing the test-year CIP expenses by the test-year sales volumes (net of CIP-exempt volumes). All revenues received from the CCRC shall be credited to the CIP Tracker account.

CCRC: \$0.01652 per therm
