

Interstate Power and Light Company

ELECTRIC TARIFF

Filed with the I.U.B.

ORIGINAL TARIFF NO. 1

Second Substitute Original Sheet No. 63.1

Rider IEDR – Infill Economic Development Rate

Availability:

Applicable to new Large General Service Customers locating in a qualified “infill” redevelopment area located adjacent to an electric transmission or distribution line of Company that is adequate and suitable for supplying the service requested. An overview and list of qualifying facilities is located at www.alliantenergy.com/infillsites.

In deciding whether to offer a specific discount, the utility shall evaluate the individual Customer’s situation and perform a cost-benefit analysis before offering the discount.

Any discount offered should be such as to significantly affect the Customer’s decision to locate to the specific infill area.

The consequences of offering the discount should be beneficial to all Customers and to the utility. Other Customers should not be at risk of loss as a result of these discounts; in addition, the offering of discounts shall in no way lead to subsidization of the discounted rates by other Customers in the same or different classes.

Estimated future revenue credit is limited to Customer’s first year non-fuel revenue, for any needed upgrades outside of reconfiguration of the existing service. If there are facility costs associated with reconfiguring service to an existing building, Company may not extend or add additional service lines unless Customer chooses to bear all such costs.

Monthly Billing:

The Customer shall comply with all terms of the standard Large General Service tariff rate under which the Customer takes service except as contravened by the following.

- For the first 12 month period, the monthly demand charge shall be reduced by 50 percent;
- For the second 12 month period, the monthly demand charge shall be reduced by 40 percent;
- For the third 12 month period, the monthly demand charge shall be reduced by 30 percent;
- For the fourth 12 month period, the monthly demand charge shall be reduced by 20 percent;
- For the fifth 12 month period, the monthly demand charge shall be reduced by 10 percent.

No discount shall be applied to transmission charges.

All subsequent billings after the fifth year shall be at the appropriate full Large General Service tariff rate.

Terms and Conditions:

The Company is not obligated to extend, expand or rearrange its facilities if it determines that existing distribution/transmission facilities are of adequate capacity to serve the Customer’s load.

The Company may offer a special electric service contract with an economic development rate subject to the terms and conditions set forth in the Iowa Utilities Board rules and under the following minimum criteria:

- a. A cost-benefit analysis must demonstrate that offering the discount will be more beneficial than not offering the discount.
- b. The ceiling for all discounted rates shall be the approved rate on file for the Customer's rate class.
- c. The floor for the discount rate shall be equal to the energy costs and Customer costs of serving the specific Customer.
