

IOWA RESIDENTIAL ELECTRIC VEHICLE (EV) CHARGING STATION REBATE CLAIM FORM

INSTRUCTIONS: Fill out form completely and sign. **Attach required documentation:** Itemized equipment receipt(s), installation invoice(s), a copy of your vehicle registration from the Department of Transportation (DOT) and a W-9 if not a residential tax filer. Failure to complete the form and provide documentation will result in this claim form being sent back or denied. For the terms and conditions of this rebate program, please see page 3 of this form.

For general information about electric vehicles and charging, visit alliantenergy.com/ev. For more information about the residential electric vehicle (EV) charging station rebate, call the Alliant Energy EV Rebate Team at 1-800-255-4268.

Select the rebate you are applying for (one rebate per customer account):

- Up to \$750 networked* Level 2 EV charging station rebate.
- Up to \$500 non-networked Level 2 EV charging station rebate.

*A networked Level 2 EV charging station – sometimes referred to as a smart charging station – must be able to connect to the internet via WiFi connection for app or web-based charging control. Level 2 EV charging stations that can not directly connect to the internet via WiFi connection are eligible for the non-networked Level 2 EV charging station rebate.

While Alliant Energy temporarily offers a rebate for both networked and non-networked Level 2 EV Charging Stations, Alliant Energy strongly encourages the purchase and installation of a networked charging station. Networked chargers allow greater communication and load management capabilities. While some vehicles or technologies can provide a degree of communication and load management, adding network capabilities to the charger can provide greater flexibility and the ability to participate in potential load management and demand response programs.

To be eligible for a residential Level 2 EV charging station rebate, you must:

- Be an Alliant Energy Iowa residential electric customer whose account is in good standing.
- Purchase and install an Energy Star, Underwriter Laboratories or Electrical Testing Labs certified Level 2 charging station connected to an electric meter billed under an Alliant Energy Iowa residential electric service rate.
- Own or lease a registered EV that can receive a Level 2 charge.
 - EV DOT registration address must match installation address on this rebate form.
 - EV charging station must be located at the installation address on this rebate form.
- Purchase and install a Level 2 EV charging station between Jan. 1, 2022, and Dec. 31, 2022.

EV rebates cannot be combined. Limit one rebate per customer account. Past recipients of Alliant Energy EV or EV charging station rebates are not eligible to receive additional rebates without prior approval.

REQUIRED CUSTOMER INFORMATION			
Customer Name		Mailing Address (if different from installation address)	
Installation Address		City	State ZIP
City	State	ZIP	Primary Contact Person for Claims Questions
Alliant Energy Account No. at Installation Address		Email Address	Phone No. ()

VEHICLE INFORMATION

Please take a moment to tell us about your EV(s). For the purpose of this rebate form, an EV can be a battery electric vehicle (BEV) or a plug-in hybrid electric vehicle (PHEV). At least one of the vehicles at the residence must be able to accept a Level 2 electric vehicle charge. This information will help Alliant Energy understand the needs of EV drivers and improve our services. It is required for the application to be processed.

REQUIRED ELECTRIC VEHICLE INFORMATION

Please complete this section about the EV that will most frequently be charged using your Level 2 EV charging station.

Make	Model	Year	Type of Purchase New Used <input type="checkbox"/> Owned <input type="checkbox"/> Owned <input type="checkbox"/> Leased <input type="checkbox"/> Leased	When was the vehicle acquired? Year _____ Month _____

IOWA RESIDENTIAL ELECTRIC VEHICLE (EV) CHARGING STATION REBATE CLAIM FORM

REBATE TERMS AND CONDITIONS

This Electric Vehicle Charging Station Rebate covers up to \$750 for the purchase and installation of a certified Level 2 networked* EV Charging station or up to \$500 for the purchase and installation of a Level 2 non-networked EV charging station installed at a residence whose electric service meter is billed under an Alliant Energy residential electric rate. Rebate will not exceed the equipment purchase and installation cost of a Level 2 charging station. Alliant Energy highly recommends that all residential Level 2 EV charging stations be installed by a licensed electrician and in accordance with local municipal codes and permitting procedures, as mentioned in more detail in the terms and conditions listed below. Alliant Energy is offering a limited number of rebates. Availability is subject to overall participation levels. Alliant Energy reserves the right to cancel or modify this rebate program at any time at its sole discretion. Submission does not guarantee inclusion in this program.

Rebate eligibility restrictions:

- Only Iowa residential customers whose accounts are in good standing are eligible for the rebate.
- Rebate is available only for Level 2 (208/240 volt) electric vehicle charging stations.
- This rebate applies to Level 2 electric vehicle charging stations purchased and installed between Jan. 1, 2022, and Dec. 31, 2022.
- Used Level 2 electric vehicle charging stations may be eligible for the rebate program. Sales receipt or invoice showing proof of purchase is required.
- Refurbished or rented electric vehicle charging stations are excluded from this rebate program.
- Electric vehicle charging stations bundled with the purchase or lease of a vehicle or otherwise included in the price of a vehicle do not qualify for this rebate.
- Electric vehicle charging stations discounted, gifted or won as part of a raffle, giveaway, grant or other discounted program do not qualify for this rebate.
- Projects must demonstrate permanency. While wall mount chargers are included, cord sets and other portable charging devices are excluded from this program.
- Past recipients of Alliant Energy electric vehicle or electric vehicle Level 2 charging station rebates are not eligible to receive additional rebates without prior approval.
- All city, county or state government, property owner or homeowner's association rules, codes and regulations must be complied with during installation of the EV charging station. All necessary permits must be obtained prior to installation. Note that Level 2 charging occurs at a higher voltage rate than the Level 1 (120 volt) electric vehicle charging equipment, and as a result, an inspection and permit may be required by the city or county where the residence is located.
- Alliant Energy highly recommends a qualified electrician install the Level 2 electric vehicle charging station and its dedicated circuit.
- Level 2 electric vehicle charging stations must be Energy Star, UL (Underwriters Laboratories) or ETL (Electrical Testing Laboratories) certified. Energy Star, UL and ETL certifications indicate the charging station has been evaluated for safety by a Nationally Recognized Testing Laboratory (NRTL).

Failure to comply with any of these requirements could result in denial of any rebate awards.

Alliant Energy reserves the right to audit your installation.

Alliant Energy reserves the right to randomly select your residence for an on-site audit to verify the installation of the rebated electric vehicle charging equipment installed at your residence. You hereby consent to such an audit, and you agree to grant Alliant Energy access to your premises or property to the extent reasonably necessary to conduct such an audit. If your EV charging station installation is selected for a field audit, you will be contacted by an Alliant Energy representative to schedule an appointment. By signing and submitting this rebate claim form, you agree to provide an Alliant Energy representative reasonable access to the installation site during normal business hours or as otherwise agreed between you and Alliant Energy. If the field audit discovers the EV charging station has not been installed as indicated on the rebate claim form, then the customer's rebate award may be rescinded.

Alliant Energy is not responsible for the failure of installed equipment.

Alliant Energy is not a party to any sales transaction between you and the manufacturer and/or dealer. Alliant Energy's liability and responsibility in connection with the Electric Vehicle Charging Station Rebate Program shall be strictly limited to the making of certain rebate payments for eligible equipment, and Alliant Energy does not make, will not provide and specifically disclaims any and all representations, warranties, covenants or guaranties whatsoever, express or implied, in connection with the electric vehicle charging station or the program itself, including, without limitation, the implied warranties of merchantability and fitness for a particular purpose. Alliant Energy shall in no way be liable or responsible for any equipment installed by, or for any act or omission of, any other entity or individual, including, without limitation, the equipment manufacturer or any electrician, technician or other service provider.

Alliant Energy reserves the right to contact you as a part of its EV market research and program evaluation activities.

Customers participating in the Electric Vehicle Charging Station Rebate Program may be contacted to participate in Alliant Energy's study of EV charging to better understand EV driving and/or charging practices and preferences, improve EV services and encourage greater EV deployment.

CUSTOMER SIGNATURE AND CERTIFICATION

I certify that I have purchased the equipment described in this form and that it has been installed at the service address indicated.
I agree to the terms and conditions associated with this form.

Customer Signature

Date

Submitting your form:

- Attach a copy of your electric vehicle registration from the DOT.
- Fill out the Electric Vehicle Charging Station Rebate Claim Form completely.
- Attach a copy of the itemized sales receipt or invoice for your Level 2 electric vehicle charging station and a copy of the installation receipt or invoice.
- Attach a W-9 form if not a residential tax status.

Mail completed forms to:

Alliant Energy
GO8 Rebate
P.O. Box 351
Cedar Rapids, IA 52406-0351

Rebates must be postmarked on or before Jan. 31, 2023, to qualify.

This program is administered by Alliant Energy. Alliant Energy is the trade name of Interstate Power and Light Company and Wisconsin Power and Light Company. The utility providing the rebates is Interstate Power and Light Company and Wisconsin Power and Light Company, Alliant Energy companies, herein referred to as Alliant Energy.

Please allow eight weeks for your rebate to be processed and for payment to be issued.

With questions call the Alliant Energy EV Rebate Team at 1-800-255-4268.

Consider signing up for our Time of Day (Iowa residents) or Nights and Weekends (Wisconsin residents) rate plans to lower the cost to charge your EV. Visit alliantenergy.com/ev to learn more.

Fueling your electric vehicle with renewable energy is Second Nature™. The electricity that powers your home is made partly with renewable fuels (like wind, solar and landfill gas) and partly with conventional fuels (like natural gas, coal and nuclear energy). Second Nature is a voluntary program that allows Alliant Energy electric customers to do more to support electricity generated from wind and solar.

Learn more about *Second Nature* and sign up at alliantenergy.com/secondnature.
