

U.S. data centers use more than 90 billion kilowatt-hours of electricity per year.*

it pays to make energy efficiency part of the plan

The CNC Program offering for data centers guides owners and operators to energy-saving opportunities during the design process and provides financial incentives that flow straight to the bottom line.

FINANCIAL INCENTIVES IN JUST FIVE STEPS

Apply for incentives in just minutes.

Customer Eligibility

Any Alliant Energy non-residential electric customer with data center, server room or other IT space is eligible. Submission of an application prior to equipment purchase is required.

Project Eligibility

The Data Center offering includes customer incentives for a wide range of energy efficiency measures and businesses.

Examples of eligible measures include, but are not limited to, the following.

- Optimization of Chillers, Cooling Towers, Compressors, Condensers or Pumps
- Motor Horsepower Reduction
- Evaporative Coolers
- Air-side/Water-side Economizers
- VFDs for Pumps or Supply Fan Motors
- Electronically-Commutated Motors (ECM) for Fans
- Wired or Wireless Sensors

- Control System Integration
- Airflow Management Measures
- In-Rack or In-Row Cooling Equipment
- Uninterruptible Power Supply (UPS)
- Power Distribution Unit (PDU)
- Server Virtualization and Collocation
