The 2014 actual energy mix shown above represents the resource makeup of renewable electricity (kilowatt-hours) purchased in Alliant Energy's Second Nature program. Alliant Energy's 2014 total electric energy mix contains the following resources: coal (45%), purchased power (40%), natural gas (10%), wind (4%), and other (1%). (Modified: 2/17/2015)

<sup>1</sup> These figures reflect the nameplate kilowatt-hour capacity of the power that we expect to generate in 2015 and/or have contracted to provide. Actual figures may vary according to resource availability.

<sup>2</sup> New Renewables come from generation facilities that first began commercial operation on or after January 1, 2001.
